

A Prestaflator pressure gauge is shown on the left, featuring a black rubberized outer ring and a white face with red and black markings. The gauge has two scales: an outer scale in PSI (0 to 170) and an inner scale in bar (0 to 12). A needle points to approximately 40 PSI. A colorful pressure indicator (green, yellow, red) is visible on the inner scale. The brand name 'Prestaflator' is printed at the bottom of the gauge face. To the right of the gauge are two Prestacycle tools: a silver metal tool with a knurled grip and a black and red handle tool with a circular head. The Prestacycle logo and website are in the top right corner.
